**H**emorrhoids concern is not exactly a choice topic at any tea or coffee gathering, remarkably though, surveys show that more than one fourth of the world's population and have more than half of the American population have actually experienced proceeding a hemorrhoid occurrence in life. This being the case *hemorrhoid treatment* is a must discuss topic no matter how hesitant or unwilling people may be of it.

Hemorrhoids or "piles" as they are also known are brought about by swelling blood vessels on the rectal area. Hemorrhoids in addition may occur in two places, they can develop either in or out of the rectum. Depending on where they "sprout" in a manner of speaking they are referred either as internal or **external hemorrhoids**. When the veins outside the anal canal increase the size of, they become what we call external hemorrhoids. These types of hemorrhoids are usually by far the more painful and uncomfortable of the two kinds. Thankfully though, they are also the easier to deal with and address as well as being the kind which heals faster. This could be attributed to the fact that since they are located outside one can easily find a hemorrhoid treatment to deal with them and you can immediately see the effects of the treatment.
